

# EVERGREENS

**Evergreens** give structure and definition to a garden retaining their form and foliage through the seasons, most notably in winter when other plant varieties have long lost their leaves. A specialty of Mori Nurseries, our fine evergreen selections are only limited by your imagination. From shaped or topiary, narrowleaf or broadleaf, weeping, conical or low spreading, green, gold or blue, the selection is indeed endless.

Weeping Blue Atlas Cedar    Select Weeping False Cypress    Weeping Nootka False Cypress    Dwarf Hinoki False Cypress & Std.    Golden Dwarf Hinoki False Cypress

Mori #	Common and Latin Names	Zone	Height	Spread	Shape	Foliage	Fruit	Description
<b>BLUE ATLAS CEDAR</b>								
139-12	WEeping BLUE ATLAS CEDAR <i>Cedrus atlantica</i> 'Glaucu Pendula'	5	3m 10'	5m 16'	Weeping, Serpentine	Silver- blue	Cone	Trunk trained into serpentine shape. Branches horizontal with long pendulous branchlets of silver-blue foliage. Slow growing.
<b>FALSE CYPRESS</b>								
140-20	WEeping NOOTKA FALSE CYPRESS <i>Chamaecyparis nootkatensis</i> 'Pendula'	5	10m 33'	5m 16'	Pyramidal, Pendulous	Green		Pyramidal. Upright arching branches of pendulous green needles. Slow growing. Also called 'Ghost Tree'.
140-21	SELECT WEeping FALSE CYPRESS <i>Chamaecyparis</i> n. 'Pendula Select'	5	8m 26'	5m 16'	Pyramidal, Pendulous	Green		A more compact and dense, slower growing selection of Weeping Nootka.
140-33	SLENDER HINOKI FALSE CYPRESS <i>Chamaecyparis obtusa</i> 'Gracilis'	5	4m 13'	1.5m 5'	Pyramidal	Dark green		Irregular slender arching branchlets with glossy, dark green fan-shaped foliage. Slow growing, pyramidal.
140-35	DWARF HINOKI FALSE CYPRESS <i>Chamaecyparis obtusa</i> 'Nana Gracilis'	4	1m 40"	1m 40"	Globose	Dark green		Irregular globose shape becomes upright with age. Dark green cupped, fan-shaped sprays. The most popular Dwarf Hinoki.
140-37	GOLDEN DWARF HINOKI FALSE CYP. <i>Chamaecyparis obtusa</i> 'Nana Lutea'	5	1.2m 4'	1m 40"	Broad, Pyramidal	Golden		Compact, slow growing golden-yellow selection.
140-48	BABY BLUE FALSE CYPRESS <i>Chamaecyparis pisifera</i> 'Baby Blue'	4	1.5m 5'	1m 40"	Upright	Silver- blue		Finer textured version of Boulevard.
140-62	GOLDEN CHARM FALSE CYPRESS <i>Chamaecyparis pisifera filifera</i> 'Golden Charm'	5	1.5m 5'	1.7m 6'	Upright	Golden yellow		A compact form with thread-like foliage emerges bright golden yellow and matures green. Upright, becoming pyramidal with age. Best colour in sun.
140-68	SUNGOLD FALSE CYPRESS <i>Chamaecyparis pisifera filifera</i> 'Sungold'	5	1.5m 5'	1.5m 5'	Mounded	Gold tipped		Golden yellow new growth matures to lime green in summer. Slow growing thread-like form. 
<b>SPREADING JUNIPER</b>								
145-18	GOLD LACE JUNIPER <i>Juniperus chinensis</i> 'Gold Lace'	3	1m 40"	1.5m 5'	Spreading Vase	Gold	Blue berry	Golden colour from tips of plant to centre. Compact vase shaped spreading form.
145-20	GOLD STAR JUNIPER <i>Juniperus chinensis</i> 'Gold Star' COPF	3	1m 40"	2m 6.5'	Spreading	Golden	Blue berry	Bright light green foliage with bright golden tips. Dense compact growth with gold coloured branches.
145-30	MINT JULEP JUNIPER <i>Juniperus chinensis</i> 'Monlep'	4	1.5m 5'	1.5m 5'	Fountain, Spreading	Mint green	Blue berry	Brilliant mint green foliage. Spreading juniper with a compact upright arching habit. Vigorous growing.
145-34	OLD GOLD JUNIPER <i>Juniperus chinensis</i> 'Old Gold'	5	1m 40"	1.2m 4'	Spreading	Bronze- gold	Blue berry	Bronze-gold feathered foliage is retained through the winter. Slow growing compact spreader with slightly upright arching branches.

Three forms of Blue Point Juniper

Mori #	Common and Latin Names	Zone	Height	Spread	Shape	Foliage	Fruit	Description
<b>SPREADING JUNIPER (continued)</b>								
145-70	SAYBROOK GOLD JUNIPER <i>Juniperus chinensis</i> 'Saybrook Gold'	4	60cm 2'	2m 6.5'	Spreading	Yellow	Blue berry	Bright yellow feathery foliage in summer takes on bronze-yellow in winter. Flat-topped spreader.
145-35	WINTER GOLD JUNIPER <i>Juniperus chinensis</i> 'Winter Gold'	4	60cm 2'	1m 40"	Spreading	Golden	Blue berry	Golden feathery foliage retains colour through the winter. Similar to Old Gold but more resistant to cold and frost damage. Compact and slow growing.
146-08	BLUE CHIP JUNIPER <i>Juniperus horizontalis</i> 'Blue Chip'	3	20cm 8"	2.5m 8'	Prostrate	Silver-blue		Silver-blue foliage tipped purple in winter. Low prostrate habit with vertical branchlets.
146-09	BLUE PRINCE JUNIPER <i>Juniperus horizontalis</i> 'Blue Prince'	3	15cm 6"	1.5m 5'	Prostrate	Steel blue		Steel blue foliage very similar to Prince of Wales. Plum winter colour.
146-04	BAR HARBOUR JUNIPER <i>Juniperus horizontalis</i> 'Glaucua'	2	30cm 12"	2m 6.5'	Prostrate	Blue green		Blue-green foliage turns purplish in winter. Low growing spreader forms a large mat.
146-79	ICEE BLUE JUNIPER <i>Juniperus horizontalis</i> 'Monber'	2	15cm 6"	2m 6.5'	Prostrate	Silver-blue		Sport of Blue Rug with silver-blue foliage. Mature foliage has purple-tinged tips. Compact, dense hardy spreader.
146-51	LIME GLOW JUNIPER <i>Juniperus horizontalis</i> 'Limeglow'	4	50cm 20"	2m 6.5'	Low	Lime green		Lime green to yellow foliage and the same habit and hardiness of its parent Andorra.
146-50	COMPACT ANDORRA JUNIPER <i>Juniperus horizontalis</i> 'Plumosa Compacta'	2	50cm 20"	2m 6.5'	Low	Gray-green		Gray-green foliage turns a plum colour in winter. Densely branched and flat spreading.
146-78	BLUE RUG JUNIPER <i>Juniperus horizontalis</i> 'Wiltonii'	2	15cm 6"	2m 6.5'	Prostrate	Silver-blue	Blue berry	Silver-blue foliage with purple tinge in winter. Very flat growing trailing branches.
146-93	DWARF JAPANESE GARDEN JUNIPER <i>Juniperus procumbens</i> 'Nana'	4	20cm 8"	2m 6.5'	Prostrate	Blue-green		Blue-green foliage, slightly purple in winter. Forms a compact mat with branches growing on one another, and branchlets of varying lengths.
147-02	SAVIN JUNIPER <i>Juniperus sabina</i>	2	1.2m 4'	1.5m 5'	Vase	Dark green	Blue berry	Dark green foliage on semi-upright vase-shaped arching branches. Adaptable to most conditions.
147-38	CALGARY CARPET JUNIPER <i>Juniperus sabina</i> 'Monna'	3	30cm 1'	2m 6.5'	Low, Spreading	Green	Blue berry	Soft green foliage on a dense, layered spreading form.
147-30	MOOR-DENSE JUNIPER <i>Juniperus sabina</i> 'Monard'	3	30cm 1'	2m 6.5'	Low, Spreading	Bright green	Blue berry	Flatter than Broadmoor with more pronounced tiered, horizontal branching. Good substitute for Tamarix.
147-53	NEW BLUE TAMARIX JUNIPER <i>Juniperus sabina</i> 'Tamariscifolia New Blue'	4	30cm 1'	2m 6.5'	Low, Spreading	Blue-green	Blue berry	Blue form of Tamarix. Feathery foliage on low spreading horizontal branches.
147-82	BLUE STAR JUNIPER <i>Juniperus squamata</i> 'Blue Star'	5	1m 40"	1m 40"	Mounded	Steel blue		Dense, compact mounded plant with steel blue foliage. This slow growing plants displays its best colour in full sun.

Mori #	Common and Latin Names	Zone	Height	Spread	Shape	Foliage	Fruit	Description
147-84	HOLGER JUNIPER <i>Juniperus squamata</i> 'Holger'	5	1.2m 4'	1m 40"	Upright, Broad	Blue-green	Black berry	Sulphur yellow new growth matures blue-green. Loosely arching branches and upright spreading form. Best colour in full sun.
<b>UPRIGHT JUNIPER</b>								
148-02	BLUE POINT JUNIPER <i>Juniperus chinensis</i> 'Blue Point'	4	3m 10'	2m 6.5'	Pyramidal	Blue-green	Blue berry	Pyramidal form with very dense branching. Very little trimming required.
148-08	MOUNTBATTEN JUNIPER <i>Juniperus chinensis</i> 'Mountbatten'	4	4m 13'	2m 6.5'	Pyramidal	Silver-green	Blue berry	Fast growing compact form with silver-green foliage. Purple fall colour.
148-16	SPARTAN JUNIPER <i>Juniperus chinensis</i> 'Spartan'	5	4m 13'	1.5m 5'	Pyramidal	Dark green	Blue berry	Fast growing pyramidal form with bright green foliage and dense branching. Needs very little to no pruning.
148-46	BLUE HAVEN JUNIPER <i>Juniperus scopulorum</i> 'Blue Haven'	2	4m 13'	1.5m 5'	Pyramidal	Sky blue	Blue berry	Upright pyramidal form with vivid sky blue foliage. More open habit than Blue Arrow.
148-48	COLOGREEN JUNIPER <i>Juniperus scopulorum</i> 'Cologreen'	3	5m 16'	1.5m 5'	Pyramidal	Forest green	Blue berry	Dense forest green. Compact, upright branching. Requires little pruning. Creates formal effect in garden.
148-54	MEDORA JUNIPER <i>Juniperus scopulorum</i> 'Medora'	3	3m 10'	80cm 32"	Columnar	Blue-green	Blue berry	Slow growing narrow columnar form. Dense blue-green foliage requires little pruning. Excellent as spiral form.
148-56	MOFFAT BLUE JUNIPER <i>Juniperus scopulorum</i> 'Moffetii'	4	4m 13'	1.2m 4'	Pyramidal	Silver-blue	Blue berry	Narrow and dense, symmetrical pyramidal form. Intense silver-blue colour.
148-66	TOLLESON'S BLUE WEeping JUNIPER <i>Juniperus scopulorum</i> 'Tolleson's Blue Weeping'	3	4m 13'	2.5m 8'	Upright, Weeping	Silver-blue	Blue berry	Unique silver-blue string-like foliage cascades from arching branches. Unusual specimen.
148-68	WICHITA BLUE JUNIPER <i>Juniperus scopulorum</i> 'Wichita Blue'	4	4m 13'	1.2m 4'	Pyramidal	Blue	Blue berry	Broad pyramidal shape with dense bright blue foliage all year.
148-71	BLUE ARROW JUNIPER <i>Juniperus virginiana</i> 'Blue Arrow' COPF	4	4m 13'	80cm 32"	Pyramidal	Blue	Blue berry	Narrow, pyramidal. Tight compact foliage remains bright blue all year. Requires little to no trimming.
148-52	GREENSPIRE JUNIPER <i>Juniperus virginiana</i> 'Greenspire'	4	4m 13'	1.2m 4'	Upright	Green	Blue berry	A Skyrocket-type with a narrow upright habit and bright green foliage.

<b>LARCH</b>								
150-20	WEeping EUROPEAN LARCH <i>Larix decidua</i> 'Pendula'	4	5m 16'	6m 20'	Weeping	Green	Cones	Weeping form will be prostrate if not staked. Unusual and beautiful specimens of which no two are alike.
<b>MICROBIOTA</b>								
147-99	NORTHERN PRIDE MICROBIOTA <i>Microbiota decussata</i> 'Northern Pride'	2	40cm 16"	1.5m 5'	Prostrate	Bright green		Feathery, bright green, juniper-like foliage turns a copper colour in the winter. Arching and flat-topped branch habit does well in the shade. Tolerates dry soils.
<b>SPRUCE</b>								
161-15	LITTLE GEM DWARF SPRUCE <i>Picea abies</i> 'Little Gem'	3	50cm 20"	60cm 24"	Globular	Green		Tiny dark green needles on a dense, flat-topped globular form. Slow growing, excellent for use in rock garden or specimen use.

Nest Spruce

161-32	NEST SPRUCE <i>Picea abies</i> 'Nidiformis'	3	1m 40"	2m 6.5'	Mounded, Spreading	Green		Dwarf, flat-topped mounded form with dense, horizontal branching and a slight depression in the centre that gives rise to its name.
160-11	WEeping NORWAY SPRUCE <i>Picea abies</i> 'Pendula'	3	4.5m 15'	1.7m 6'	Upright Pendulous	Rich green	Cones	Unique form. When left unstaked, Weeping Norway Spruce can be used as a groundcover. The height determined by staking. Pendulous branches of rich green foliage.
161-36	DWARF ALBERTA SPRUCE <i>Picea glauca</i> 'Conica'	4	2m 6.5'	1.2m 4'	Conical	Light green		Tight conical form. Fine with dense foliage emerges light green and matures to gray-green. Very slow growing variety. Protection from winter winds is recommended.
160-21	BAKERI BLUE SPRUCE <i>Picea pungens</i> 'Bakeri'	3	9m 30'	4.5m 15'	Pyramidal	Blue	Cones	Very slow growing dwarf variety. Dense and relatively narrow habit. Striking blue needles. Ideal for specimen use.
160-27	FAT ALBERT BLUE SPRUCE <i>Picea pungens</i> 'Fat Albert'	3	5m 16'	2.5m 8'	Pyramidal, Broad	Blue	Cones	Outstanding blue foliage with naturally straight leader. Well-shaped broad pyramidal is densely branched and very slow growing.

161-42	GLOBE BLUE SPRUCE <i>Picea pungens</i> 'Glauca Globosa'	2	1m 40"	1.5m 5'	Globose	Silver-blue	Cones	Slow growing, dwarf globe. Flat-topped and globose when young, becomes broadly upright with age.
160-24	HOOPSI BLUE SPRUCE <i>Picea pungens</i> 'Hoopsii'	2	15m 50'	6m 20'	Pyramidal, Dense	Silver-blue	Cones	Dense pyramidal form with horizontal branches of silver-blue. Slow growing at first, considered to have best shape of all Blue Spruce.
160-30	NEON BLUE SPRUCE <i>Picea pungens</i> 'Neon Blue'	3	9m 30'	5m 16'	Pyramidal	Bright blue	Cones	Slow growing, naturally tight symmetrical shape and bright blue needles all season. No pruning required. Improved selection of Colorado Blue.
<b>PINE</b>								
165-02	BRISTLECONE PINE <i>Pinus aristata</i>	2	1.5m 5'	1.5m 5'	Upright	Green	Cones	Dwarf pine native to the American Rockies. This slow grower is ideal for rock gardens and bonsai feature.

165-09	VANDERWOLF'S PYRAMIDAL PINE <i>Pinus flexilis</i> 'Vanderwolf's Pyramid'	4	6m 20'	3m 10'	Narrow, Pyramidal	Blue-green		Soft textured silvery blue-green needles on uniformly ascending branches. Pyramidal form broadens with age. Withstands ice and snow.
165-15	DWARF MUGHO PINE <i>Pinus mugo</i> var. <i>pumilio</i>	1	1m 40"	2m 6.5'	Mounded	Dark green	Cones	Low growing form, width 2x height. Dark green needles. Tolerates partial shade. Prune candles to maintain compact shape. Very hardy.
165-16	AUSTRIAN PINE <i>Pinus nigra</i>	4	17m 56'	9m 30'	Pyramidal	Dark green	Cones	Densely pyramidal when young, large and broad with age. Stiff needles. Hardy, salt and drought tolerant. Adaptable to various soils. Specimen or screen.
165-40	EASTERN WHITE PINE <i>Pinus strobus</i>	3	20m 66'	9m 30'	Pyramidal	Blue-green	Cones	Soft blue-green needles. Fast growing pyramidal, eastern Canada Native. Screen or specimen. Not wind tolerant.
<b>YEW</b>								
170-14	CLIPPED PYRAMIDAL JAPANESE YEW <i>Taxus cuspidata</i> 'Capitata' Clipped	4	4m 13'	3m 10'	Pyramidal	Dark green	Red berry	Trimmed selection of the Upright Japanese yew. Also available in Poodle, PomPon and Spiral forms. Used as specimens in sun or shade.
170-15	FEATHERED YEW <i>Taxus cuspidata</i> 'Capitata' Feathered	4	4m 13'	3m 10'	Pyramidal Upright	Dark Green	Red berry	Upright Japanese yew. Ideal as hedging or specimen. Tolerates any amount of pruning and shearing.

170-18	DWARF JAPANESE YEW <i>Taxus cuspidata</i> 'Nana'	4	1m 3'	1m 3'	Mounded Spreading	Dark green	Red berry	Slow growing dwarf form with dark green needles radially arranged on spreading branches.
171-35	EMERALD SPREADER YEW <i>Taxus cuspidata</i> 'Monloo'	4	80cm 32"	2.5m 8'	Spreading	Dark green	Red berry	Low, flat-topped spreader with glossy dark green needles. The slow growing evergreen is suitable for groundcover, low hedges or slopes. Requires no maintenance.
171-19	THAYERAE YEW <i>Taxus cuspidata</i> 'Thayerae'	4	6m 20'	2.5m 8'	Spreading	Green		Fast growing and broadly spreading. Resistant to winter burn.
171-26	BROWN'S YEW <i>Taxus x media</i> 'Brownii'	4	2m 6.5'	2.5m 8'	Rounded	Dark green		Naturally rounded dense form that is easily trimmed into globes. Excellent for use as foundation or hedging plants.
171-30	DENSE YEW <i>Taxus x media</i> 'Densiformis'	5	1.2m 4'	1.7m 6'	Rounded	Dark green		Broad dense shrubby form with soft dark green needles. Slow growing. Use as foundation, specimen or hedging.
171-27	DENSI-GEM YEW <i>Taxus x media</i> 'Densi-Gem'	5	1.5m 5'	1.5m 5'	Rounded	Dark green		Rounded spreading form that is faster growing than 'Densiformis'. Differs with fuller, feathery appearance.
171-31	FAIRVIEW YEW <i>Taxus x media</i> 'Fairview'	4	2m 6.5'	1.5m 5'	Semi- upright	Dark green		Hardy, semi-upright dwarf yew, dark green needles. Ideal for hedging and foundation use or as a specimen.
171-44	HICK'S YEW <i>Taxus x media</i> 'Hicksii'	5	3m 10'	1m 40"	Columnar	Dark green	Red berry	Columnar habit is narrow in youth, broader with age. Lustrous dark green needles. Upright branching.
171-46	HILL'S YEW <i>Taxus x media</i> 'Hillii'	5	3m 10'	1m 40"	Broadly pyramidal	Dark green		Compact, broadly pyramidal form very similar to Hick's but with shorter, denser needles.
171-34	BLACK YEW <i>Taxus x media</i> 'Nigra'	4	2m 6.5'	3m 10m	Spreading	Dark green	Red berry	Slow growing and broadly spreading with dark, broad needles.
171-50	SUNBURST YEW <i>Taxus x media</i> 'Sunburst'	5	2m 6.5'	3m 10'	Broadly spreading	Golden yellow		Broad spreader. Golden yellow new growth slowly fades to pale green in winter. Achieves its best colour in full sun.

Ward's Yew

### CEDAR

175-33	DANICA DWARF GLOBE CEDAR <i>Thuja occidentalis</i> 'Danica' COPF	3	1m 40"	1m 40"	Globe	Emerald green		Slow growing compact globe form with glossy emerald green foliage.
175-37	DEGROOT'S SPIRE CEDAR <i>Thuja occidentalis</i> 'DeGroot's Spire'	3	4m 13'	80cm 32"	Narrow, Pyramidal	Green		The superior choice for narrow spaces. Slow growing and densely branched.
175-43	EMERALD CEDAR <i>Thuja occidentalis</i> 'Smaragd'	3	4m 13'	1m 40"	Pyramidal	Emerald green	Cones	Compact, narrow pyramid. Dense emerald green foliage. Heat tolerant. Most popular upright Cedar.
175-18	GOLDEN GLOBE CEDAR <i>Thuja occidentalis</i> 'Golden Globe'	3	1m 40"	1m 40"	Globe	Golden yellow		Bright golden form of 'Woodwardii'. Round, bushy compact form with golden yellow foliage that holds its colour all year.
175-40	HOLMSTRUP CEDAR <i>Thuja occidentalis</i> 'Holmstrup'	3	2.5m 8'	1m 40"	Pyramidal	Bright green	Cones	Slow growing compact pyramid with rich, bright green foliage that holds its colour all year.
175-13	LITTLE GIANT GLOBE CEDAR <i>Thuja occidentalis</i> 'Little Giant' COPF	3	1m 40"	1m 40"	Globe	Green		Slow growing dwarf globe with rich green foliage.
175-11	MORI COMPACT GLOBE CEDAR <i>Thuja occidentalis</i> 'Mor-Select'	3	1m 40"	1.5m 5'	Globe	Dark green		Mori selection chosen for its compact and bushy globe shape. Tighter and more compact than 'Woodwardii'.
175-45	RHEINGOLD CEDAR <i>Thuja occidentalis</i> 'Rheingold'	3	1.2m 4'	1m 40"	Mounded	Golden- bronze	Cones	Slow growing, mounded to conical shape with golden bronze foliage that holds colour all year.
175-41	YELLOW RIBBON CEDAR <i>Thuja occidentalis</i> 'Yellow Ribbon'	3	3m 10'	1m 40"	Upright	Golden yellow	Cones	Narrow upright cedar with golden yellow foliage that holds its colour all year. Slow growing.
175-65	BERKMAN'S GOLD CEDAR <i>Thuja/Platyclusus orientalis</i> 'Aurea Nana'	6	1.5m 5'	1m 40"	Conical	Green- gold	Cones	Slow growing dwarf has dense foliage of light green-gold with contrasting yellow tips. Turns slightly brown in winter.

### HEMLOCK

180-10	CANADIAN HEMLOCK <i>Tsuga canadensis</i>	4	20m 66'	8m 26'	Pyramidal	Dark green	Cones	Glossy, dark green foliage on a pyramidal form becoming pendulous with age. Does well in shade. Intolerant of city conditions and wet soils.
180-13	GENTSCH WHITE DWARF HEMLOCK <i>Tsuga canadensis</i> 'Gentsch White'	4	60cm 2'	60cm 2'	Globose	White tipped		Slow growing dwarf globe has white tipped branches. Shear annually to maintain compact habit and promote white new growth.

Canadian Hemlock
